# The Prospero Library

Reference books are the foundation blocks upon which great collections are built. Without these carefully researched works, some written only after a lifetime's study, the understanding of coins, and by association their value - historic, social, economic, artistic and monetary would be lost.

The Prospero library is one of the most important numismatic libraries to come onto the market in recent years. Although it is not as extensive as those of M&M or Herbert Kreindler, and not as academically important as that of Georges Le Rider, it does focus solely on Greek numismatics and as such contains many of the most important catalogues and references written on this vast and fascinating area of numismatics. Perhaps more importantly, in terms of quality the Prospero library is unsurpassed.

The vast majority of books have been carefully and beautifully bound. Some originally but many recently, with a large proportion by that great bindery - Sangorski & Sutcliffe, London's oldest and most prestigious bookbinders, who are responsible for some of the most beautiful and ornate bindings of the twentieth century. One such example is Catharine Lorber's work on the coinage of Amphipolis. The Prospero copy has been exquisitely bound using the very symbol seen on the coinage, the distinctive race torch, gilt embossed on both boards and repeated down the elegantly decorated spine. It is one of a number of books within the library which show how the quality and craftsmanship of a skilled binder can turn a reference book of intellectual value into a work of art in its own right.

The lavish treatment of this book shows that it is not just the rarest and most expensive of titles which have been so carefully considered. A number of the more readily available, classic works on Greek coins have been given similar treatment. Barclay Head's 'Historia Numorum' which has been splendidly bound in full crimson goatskin is just one, George Hill's beautiful work 'Select Greek Coins' is another, as are two of Charles Seltman's guides to Greek coins, 'Masterpieces of Greek Coinage' and 'A Book of Greek Coins.' Two small, inexpensive and often overlooked introductions to the subject which have been transformed by the attentions of a skilled bookbinder.

Most of the major reference books published during the last century or more relating to the coinage of Magna Graecia, mainland Greece and Asia Minor are included here, as well as publications of important collections, Sylloges and important auction catalogues. Babelon's monumental Traité is an obvious example, whilst other titles worthy of particular mention are Béule's sumptuously bound work on the coinage of Athens, Boehringer's seldom offered work on the coinage of Syracuse. Rizzo's beautiful masterpiece, 'Monete Greche Della Sicilia' is another standout piece, along with Robinson and Clement's very rarely seen volume on the Excavations at Olynthus. There are also fine examples of many of the major published collections - that of the British Museum, the Jameson collection, Regling's catalogue of the Warren collection, along with the Gulbenkian and the highly important Weber collection. Complete, original sets of SNG Copenhagen and Von Aulock are both present and in the auction catalogues, a complete set of the famous Ars Classica/Naville sales along with the Hirsch catalogue of Athanasious Rhousopoulos's wonderful collection are just two of the highlights.

The books within this catalogue present the collector with a wonderful opportunity to add to their own library and for those who have not yet begun, a fantastic place to start the wonderful journey of building a library of their own.

## THE VERY RARELY SEEN PHOTOGRAPHIC PLATES OF THE LEGENDARY GILLET COLLECTION

13. [Gillet, Charles] **The Gillet Collection.** Bound volume consisting of 58 photocopied plates illustrating 1,217 Greek coins from this legendary collection. Bound by Sangorski & Sutcliffe in half maroon morocco and matching cloth boards. Lettered in gilt. *Boards a trifle rubbed, else a very fine set.* **£750**

The Gillet collection is without doubt one of the most extensive and beautiful collections of Greek coins sold in the twentieth century. Gillet was a prolific collector, well known for his impeccable taste and after his death in 1972, the decision was taken to sell some of the highlights from the collection. The 253 coins chosen formed the now famous Kunstfreundes sale held jointly by M&M and Bank Leu in Zürich, 1974 (see item number 243 for an exceptionally fine copy of this sales catalogue). The photographs of the complete collection were taken, probably by Silvia Hurter prior to the collection's dispersal, and provide the only complete record of the collection as a whole. Only a handful of the original photographs are known to exist, and even copies (as here) are very rare. The plates here have been photocopied from an original set and although the quality is unfortunately inferior, they are still a highly important record of this magnificent collection and a most useful reference.

## THE McCLEAN COLLECTION OF GREEK COINS

All three volumes uniformly bound in dark green morocco and matching cloth boards. Raised bands, panelled and lettered in gilt. Top edges gilt. Marbled endpapers. Some unobtrusive watermarks to the top boards on the first and second volume otherwise an excellent set, expertly bound. *A superb record of this remarkable collection, listing over 10,000 coins, now housed in the Fitzwilliam museum.* **£1,950**

Clain-Stefanelli 1887*; Daehn 1770, 'This is one of the great collections, expertly catalogued…Also includes some very useful indices, including a geographical index and indices to types, inscriptions, monograms, symbols and persons. These indices, along with the vast scope of the collection, make this one of the most useful catalogues for scholars, collectors, and dealers in Greek coins.' Grierson 57; Kroh 10.

Clain-Stefanelli 3406*; Daehn 860, 'A comprehensive guide to identifying Greek coins. Anson's original goal was to produce two sections classifying every known Greek or Graeco-Roman coin type under the heading of the type and also of the symbol or symbols represented on the coins…Section 1 covers coin types showing inanimate objects, plants, etc. which occur either alone or as symbols in conjunction with figures, animals, etc. Section 2 was to cover animate objects such a figures of deities, heroes, dynasts, animals etc., but this section was never published… G. F. Hill wrote a brief and critical review of Parts 1-4 which appears in the Numismatic Chronicle 4th ser., 11 (1911): 199. Interestingly [he] warns of the difficulties Anson will encounter when he attempts to publish Section 2…Apparently Anson took heed of this warning as noted above.' A CABINET OF GREEK COINS

BEHOLD portrayed in miniature, yet clear,
The changing seasons of Hellenic art;
Fair spring-time, when dim, haunting visions start
Forth into life, and forms divine appear;
Full, radiant summer, when a heaven-born skill
Achieves such height as man ne'ermore can gain
Drear autumn of decay, wherein remain
Mere phantoms which a glimmering twilight fill.
Here too the Olympic pantheon displays
Pure, grand ideals of each dreaded god,
Or cherished goddess, or loved nymph enshrined.
With likeness too of many a king whose nod
Could empires shake. Thus various-hued we find
A rich emblazonry of ancient days.

Anarcharsis was a Scythian philosopher who, around c. 600 B.C. left his native country, supposedly in the Cimmerian Bosporus, to travel in pursuit of knowledge. His travels took him to Athens where he was well received and became known as one of the 'Seven Sages of Greece.' Although none of his written works survive, the classical scholar Jean Jaćques Barthelemy published an imaginary account of the travels of one of Anarchasis's successors in 1788. This work is based on those travels and is an interesting and informative account of the coins that might have been encountered during that time. Daehn 61; Leitzman 72.

69. Head, B. V. & Svoronos, J. **ΙΣΤΟΡΙΑ ΤΩΝ ΝΟΜΙΣΜΑΤΩΝ (Historia Numorum)**. Athens, 1898. Two volumes of text, one of plates. Octavo, pp. x, 164, (1), 631, (1); viii, 583, (1), 5 tables. With; Atlas of 35 beautiful plates, illustrating almost 400 wonderful Greek coins. Athens, 1898. The first two volumes in contemporary quarter red morocco and matching marbled boards. The two volumes of text are a reprint of Head's landmark work *Historia Numorum*, translated into Greek by Jean Svoronos. The superbly printed plates were issued to accompany the original edition of Barclay Head's great work and are very rarely seen. It has been suggested that fewer than 200 sets were issued, and sets in any condition are now rarely offered for sale. Consequently a very poor reprint was issued firstly in 1968 and then again (although sadly the quality was no improvement) in 1976. Previously lot 164 in the Johan Christian Holm sale held at Spink in 1987 with his bookplate on the front pastedown of the first volume. **£3,750**

A complete run of these important catalogues focusing solely on Ancient coins (sale IX consisted of Swiss coins only and is therefore omitted). The Naville/Ars Classica sales are one of the most important series of sales for Ancient Greek and Roman coins ever issued. The quality of the coins offered throughout the sales was consistently exceptional and include some of the most important collections of the time, most notably perhaps is Pozzi the first sale which remains the most important and difficult to obtain of the series. Other noteworthy collections include those of the British Museum Duplicates, Clarence Bement, Sir Arthur Evans, Grand Duke Alexandre Michailovitch, Baron Petrowicz, Reverend Rogers, Jules Wertheim, Captain Spencer Churchill, Professor Oscar Bloch and many others. The coins were expertly catalogued by Jacob Hirsch and are accompanied by consistently superb plates, many of which illustrate every single coin offered, an expensive and, as such, unusual feature at this time which make it possible to clearly identify plate coins and determine important provenances. The sales feature heavily in John Spring's 'Ancient Coin Catalogues' reference with twelve catalogues in the list of 'Most Important Sales of Greek Coins', two in his list of 'Most Important Sales of Celtic Coins', two in the 'Most Important Sales of Aes Grave' listing, one in the 'Most Important Sales of Roman Republican Coins' list, nine in the 'Most Important Sales of Roman Imperial coins' list, two in the 'Most Important Sales of Byzantine Coins' list, and finally one in his listing of the 'Most Important sales of the Coins of the Barbarian Migrations.'

*The Prospero Collection was one of the most significant sales of ancient Greek coins to appear on the market in decades. It encompassed coinage from the entire ancient Greek world, selected for their beauty, rarity and historical significance.*

*Aside from the aesthetic qualities of the coins, as with all important numismatic collections the intellectual aspects of the pursuit were of primary importance, and a substantial library of reference works was put together as the collection developed.*

*We are delighted to offer The Prospero Library in its entirety for sale.*
